

BIOSCIENCE TECHNOLOGY OVERVIEW

BIOSCIENCE TECHNOLOGY provides readers with the most comprehensive, up-to-date coverage of products and technology for the life sciences. Product news is supplemented with in-depth discussion of advances in the most active sectors, coverage of applications of specific technologies, and sections that focus on the most widely used technologies.

BIOSCIENCE TECHNOLOGY is read and collected by scientists working at some of the largest and most prestigious life sciences companies, universities, and research facilities, as well as smaller diagnostic development company laboratories. BIOSCIENCE TECHNOLOGY serves scientists in biological research

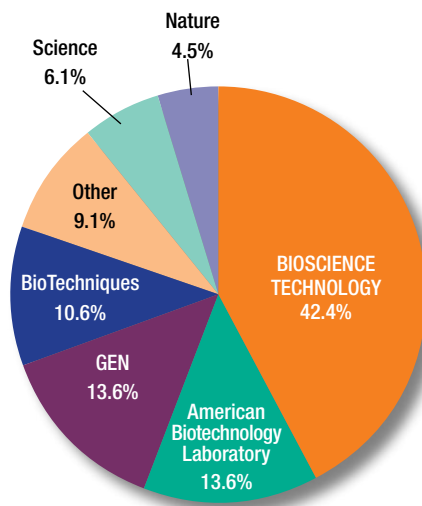

methods to further understand all aspects of human health and disease, and in the development of new therapeutics and diagnostics. Scientific research explores how biological components work, how diseases develop, and look for possible remedies.

BIOSCIENCE TECHNOLOGY readers work in academic, government, pharmaceutical, biotechnology, contract research organizations, private research institutes, medical schools, hospitals, and diagnostic development company laboratories, as well as industrial labs.
